Education:

<u>Austin Coding Academy: in person in Austin, TX</u>

December 2022-December 2023

- Completed an intensive and immersive Full-Stack JavaScript Development academy, covering a comprehensive curriculum with frontend and backend technologies through real-world projects.
- Applied theoretical knowledge through real-world projects, gaining practical experience in solving complex problems and developing scalable web applications.
- Implemented responsive design principles to create accessible web applications across various devices, resulting in a focus on accessible user interfaces and a positive user experience.

Experience:

<u>Owting: Pre-seed Startup based in California</u>

Senior Full-Stack Engineer

April 2023-Present

- Contributed to developing version two of the mobile app using React Native, Expo, Socket.io, and Redux on the frontend, and Next.js, Prisma Studio, and Node.js on the backend.
- Collaborated with cross-functional teams to define project milestones and ensure alignment with product goals.
- Utilized Figma for UI/UX design, translating concepts into functional and visually appealing interfaces.
- Managed project tasks with Jira, facilitating efficient prioritization and tracking progress to meet deadlines.
- Participated in code reviews, ensuring code quality and adherence to best practices, and assisted in bug fixing efforts.

<u>902 Youth: Non-Profit based in Massachusetts</u>

Team lead & Frontend Engineer

December 2023-Present

- Led full-stack projects using React.js, Redux, Python, and MySQL, ensuring timely delivery and quality outcomes.
- Facilitated collaboration between development, IT, and marketing teams, aligning on project objectives and requirements.
- Managed version control and code review processes, ensuring codebase integrity and stability.

- Personally contribute to the frontend development of the project, creating reusable components with Typescript and React.js.
- Directed bug-fixing efforts and provided technical guidance, resolving merge conflicts and other issues promptly to maintain project momentum.

Ripple Learning LLC: contract job based in Austin, TX
Frontend Engineer
February 2024-March 2024
- Conceptualized, designed, and developed Full-Stack JavaScript Applications from ideation to deployment, showcasing proficiency in HTML, CSS, JavaScript, React.js, Node.js, Express.js, and MongoDB.
- Incorporated secure user authentication and authorization functionalities, resulting in data integrity and user privacy.
- Designed and implemented a robust NoSQL database schema using MongoDB, optimizing data storage and retrieval for efficient application performance.
- Developed RESTful APIs to facilitate seamless data fetching between the frontend and backend, adhering to industry best practices for API design.
- Implemented CI/CD pipelines for automated testing and deployment, resulting in a streamlined development process and ensuring code reliability.
